

Due to the short time span for this peer review my review is a bit rushed, but I've done a comparison to my work and as far as I can see, you've implemented the new rules with Strategy Pattern correctly, and the Observer Pattern as well.

I did however notice that you changed your controller to include "view.IView m_view" and "model.Game m_game" as attributes. This gives you an association to these classes, and you did not update your class diagram to reflect this. Chapter 16 in *Applying UML and Patterns* (Larman C., Applying UML and Patterns 3rd Ed, 2005, ISBN: 0131489062) discusses this.

Do you think the design/implementation has passed the grade 2 criteria?

Yes, just update the class diagram.
